Turn this conversation into a list of to dos

Below is a **clean, actionable, Replit-ready To-Do list** distilled from the entire conversation you uploaded.

Every item is derived directly from the document's content, which repeatedly emphasizes sovereignty, decentralization, internal models, distributed data pipelines, and metrics-driven decision-making.

✅ SOVEREIGNTY PROTOCOL — Replit Task List

1. Establish Core Sovereignty Architecture

- Define what "100% sovereignty" means in measurable engineering terms.
- Audit current dependencies (LLMs, APIs, compute, data sources).
- Identify the 40% of complex queries still relying on external LLMs.
- Design a plan to replace each dependency with internal equivalents.
